

KAESTLE BOOS ASSOCIATES SELECTED BY HOTCHKISS SCHOOL

New Britain, Connecticut, May 2, 2006 – Kaestle Boos Associates, a New Britain based architectural firm that specializes in educational projects, has been selected by The Hotchkiss School in Lakeville, Connecticut, to construct a new synthetic multi-purpose athletic field. The project comes after Kaestle Boos Associates completed an athletic facilities assessment and master plan for the school.

“As athletic programs increase, available spaces to build new fields in a reasonable proximity to campus can be problematic, costly and in conflict with the schools’ master plan of development,” says Charles W. Boos, CEO of Kaestle Boos Associates. “The use of synthetic turf in place of natural grass is therefore becoming a more viable option as a means to satisfy program requirements. Synthetic turf provides flexible, continuous use for a variety of sports and substantially extends the playing seasons from early spring to late fall.”

The new field at the Hotchkiss School is expected to be completed in time for the Fall 2006 season.

Kaestle Boos Associates, Inc., is a full service design firm headquartered in New Britain, Connecticut with offices in Massachusetts and New Hampshire. The firm specializes in educational, public safety, theater arts, parks and recreation and other public architecture. Founded in 1963, the firm’s ultimate goal is to create structures that are functional, aesthetically pleasing, environmentally sound, and economically justifiable.
